

## RETRY ON RETURN CODE

Enter the minimum job return code that should cause the job to retry.

For example:

If you want the job to retry if it returns 5 or more as the return code, you would enter '5' in this field.

Actions

Should this job create events?  Should this job create events on success?

Maximum Minutes: 0

Late Minutes: 0

Activate Job [ ] if this job is more than 0 minutes late.

Skip this job if it is 0 minutes late or if it will finish after 00:00:00  Skip all jobs in this batch

Max Good Return Code: 0 Min Good Return Code: 0

Activate Job [ ] if this job fails

Retry on Return Code: 5 Times To Retry: 3

Job Pulse Rate: 0 Last Pulse: 12/20/2022 12:13:04.95

Priority: 5 (0 = highest, 9 = lowest)

For every 0 minute(s) late, escalate this jobs priority by 0

Generate Event 0 on job success

Generate Event 0 on job failure

Jobs will retry immediately unless the Agent has been configured with a Minimum Minutes between Job Retries, in which case the job will not retry until that number of minutes has elapsed. Other pending jobs will be executed during this waiting period if they exist.

Enter '0' in this field if the job should not retry.

To limit the number of times a failed job should retry, use the Times To Retry option. In this example, the job will retry 3 times.
